Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Process ^{of} for making decorative automotive interior trim articles with integrated components

Preliminary Class

264

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**PROCESS OF MAKING DECORATIVE AUTOMOTIVE INTERIOR TRIM
ARTICLES WITH INTEGRATED COMPONENTS**

Related Applications

Priority is claimed based on U.S. Provisional Application No. 60/139,757 filed in the U.S. Patent & Trademark Office on June 15, 1999, the complete disclosure of which is incorporated herein by reference.

Field of the Invention

This invention relates to a process of making automotive interior trim articles containing a panel structure mountable in an automobile vehicle, and in particular to automobile interior trim articles, such as instrument panels and door panels, which include integrated ornamental components, especially molded ornamental components.

Description of the Related Art

Interior panels such as door panels and instrument panels generally include bodies formed from a decorative plastic covering that is supported on a rigid support structure and has mounted thereon a variety of ornamental components. Among components commonly found in vehicles are speaker grilles, cloth or other molded bolsters, map pockets, weather seals, wood-grain trim, and the like.

Production of interior panels conventionally involves the formation of the decorative plastic covering on the rigid support structure, followed by the post-application of the ornamental components. The post-application of ornamental components is by its very nature characterized by several drawbacks. For example, the post-application step requires the precise placement and fastening of the components onto the interior panel covering. Moreover, to permit fastening of the components to the interior panel covering, the components usually require a backing component. These tasks can be very time-consuming and labor intensive, and often results in the presence of unwanted gaps between the components and interior panel covering. Additionally, the presence of an additional processing step increases tooling and capital costs and labor requirements.

Thus, there is a significant need in the art for a process for producing interior panels in which the requirement for mechanical fasteners is significantly lessened or eliminated, and in
